Self-isolate*: you should limit contact with others for 14 days from their last day of travel or your last contact with the case or person suffering from respiratory illness. There's a chance you could get sick since it's less than 14 days since their exposure. You should self-isolate until 14 days after the exposure. Self-isolation means don't go to any public places, stay at home, and don't have any visitors. Don't share personal items like dishes, utensils and towels. Wash your hands often. If you have questions, visit <https://www.canada.ca/en/public-health/services/diseases/coronavirus-disease-covid-19.html>

Since you do not have symptoms at this time, you do not need to be tested. Contact 811 if symptoms develop.
